Description

This is a premium universal carpet mat with our exclusive griplock backing. Griplock nibs are one of the most aggresive in the industry because of they grip to the carpet securely to minimize mat shifting. The heavy vinyl also helps resist curling and combined with our automotive nylon carpet, this mat is in a class of it's own. Available in both four piece and two piece sets.

With the thickness and nib size of our mats making true embroidery almost impossible, we utilize embroidered emblems. Not only does the emblem show great detail in your artwork, it does not destroy the backing of the mat as embroidery does. Set into the mats, this gives a very classy OEM look to the 6000 Series Griplock mat.
