Description

This is a premium universal carpet mat with our exclusive griplock backing. Griplock nibs are one of the most aggressive in the industry because of they grip to the carpet securely to minimize mat shifting. The heavy vinyl also helps resist curling and combined with our automotive nylon carpet, this mat is in a class of it's own. Available in both four piece and two piece sets.

For a slightly more subtle look, the embossed heel pad os heat stamped vinyl with your comapny logo impressed on. With several colors of vinyl available, this makes a softer look for those who do not want to use multiple colors on their art. Being the least expensive of the customizable options for the 6000 Series Griplock mat makes this product a great value as well as a very functional product.
